That is why we allow every client ample time to share their story so that they can receive the best individualized care. We believe that by keeping our practice small, client focused and private pay lends to more therapeutic outcomes and growth.

We have extensive experience working with diverse populations as well as in Crisis Management. Some areas we specialize in are working with: children/families, couples counseling, substance abuse and life/motivational coaching. We are looking to use our skills and experience to help serve our community.

Our services include: individual, couples, and family counseling, case management services, consultations, workshops and in-service trainings. We can provide wrap around services to our clients and we treat each referral individually and design treatment plans for each client's specific needs.
